ILLUSTRIS Healthcare
A control panel perfect for hospitals, health centres and other clinical areas

Helvar

ILLUSTRIS Healthcare (**2XXPL/2XXHL**) is a control panel designed to withstand frequent cleaning with liquid detergents, making it perfect for clinical environments, and the ideal choice for spaces which are cleaned regularly. It can even be controlled remotely through Bluetooth and the Helvar SceneSet app.

ILLUSTRIS panels are available for every application, including options with full colour and colour temperature control (DALI Type 8) in addition to brightness and scene control. The panel design can be selected in standard black or white, or can be fully customised with a selection of RAL colours and button layouts.

The rounded corners on both the plastic and glass finished fascia ensure safe cleaning and operation, even in a hurry.

IP44 Protection
The structure of the glass panel can be sealed with silicone gasket to IP44 level. The sealed panel withstands moisture and regular cleaning, even with the use of strong detergents.
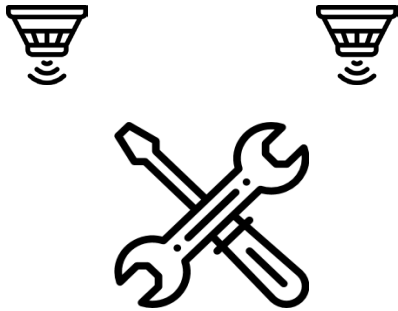

Turning Everyday Places into Brighter Spaces
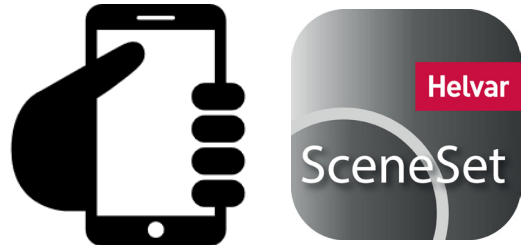

ILLUSTRIS 2XXPL & 2XXHL

The versatile control panel created for public spaces

Helvar

Full control of light levels, colour temperature and lighting conditions. You can change, save and call scenes, or customise a panel to suit your needs.

SIMPLE INSTALLATION

Two part construction featuring a DALI Interface and ILLUSTRIS Fascia. Store default lighting pre-set scenes at the touch of a button. Immediate control of colour temperature and full colour devices with no need for specialist commissioning.
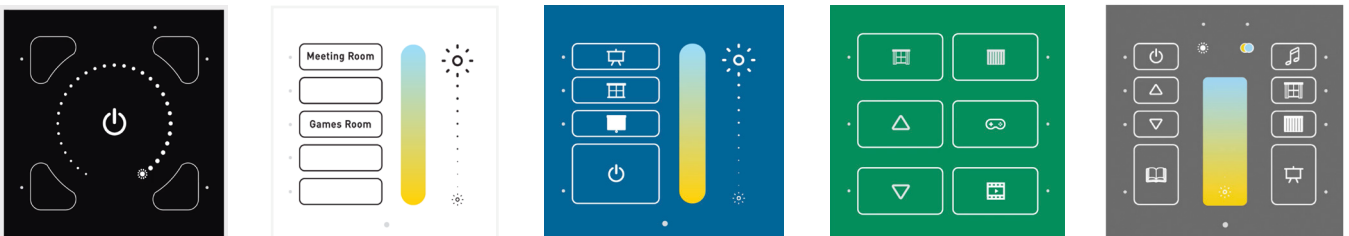

APP CONNECTIVITY

The touch panels can be connected wirelessly using Bluetooth Smart™ and can also be operated via the Helvar SceneSet app. Achieve full lighting control from the convenience of an iOS or Android smartphone or tablet. The app automatically mimics ILLUSTRIS panel controls.

PERSONALISATION

The panels consist of two parts, the front and the back. The 2XXPL and 2XXHL come in 23 different colours with 18 varieties of fascia layouts in either plastic or glass, so you can customise each of your panels to your individual requirements and preference.
